## Description

Extraordinary architecture with natural and luxurious landscape areas, low-rise housing with gardens, spacious balconies, terraces and high-quality materials carefully selected for these purposes...

An absolutely special way of life in the most valuable area of Istanbul, which retains the vibrant atmosphere of the street and interprets the usual residential architecture in a modern way.

With its unique location and architecture in the heart of Besiktas, among the branches of 200-year-old trees reaching the sky with hints of the blue of the Bosphorus, a project is being launched that will become a legacy for future generations.

Offering a limited number of privileged amenities for the ultimate in professional living.

An innovative approach to an area with a deeply rooted history, designed by master architects, is proposed to create an exclusive project in an elite area.

The new gem of Istanbul, apartments with spacious gardens and terraces with private spaces, where you will live in security 24/7, allowing you unlimited entertainment with social amenities and time with your family.

On foot you can reach the Bosphorus Strait, the historical and modern blue center of history, among the historically fragrant streets of Besiktas, and enjoy the ferry overlooking the Bosphorus.

To avoid traffic jams, which are one of the biggest problems of our time, you can quickly get to the main attractions of the city by ferry and metro. This will make you remember the convenience and practicality of living in the center, where there are schools, hospitals, historical monuments and bazaars around.

Project area: 17.655 m2

Number of units: 295
