Description

The project is located in Göktürk, one of the most prestigious areas of the city, just 20 minutes from the center, surrounded by greenery and clean air. The ecologically clean area near the Belgrade Forest is a favorite place for upper-class families who want to live away from the bustling center of Istanbul, but within easy access to it.

For years, the area was closed to foreigners; only locals had the right to purchase real estate. The complex is the only project in Göktürk that is open for sale to foreign citizens.

Real estate prices in Göktürk have tripled in 3 years.

The investment value of the project is also facilitated by the opening of a metro line leading to the new airport. The station is 10 minutes walk from the project.
