Description

The project is located on an area of 18,003 m². The complex is designed to offer future families comfort, security and amazing scenery.

The multi-block structure of the complex consists of 5 residential blocks and 365 apartments, which are connected to each other in a single complex, where the blocks are located from each other at a sufficient distance of 42 meters and 29 meters on the side for convenience and maintaining the privacy of the residents of the complex.

The project is a comfortable gated complex with a guarded territory, video surveillance, above-ground and underground parking areas, as well as appropriately built-in infrastructure inside the complex.

The complex includes: a beautiful green courtyard area with children's playgrounds and gazebos, a built-in 62-meter outdoor swimming pool, a cafeteria, SPA amenities, an indoor pool and a fitness room for free use by residents of a first-class complex.

Aiming to create a unique cultural environment, the complex includes residential, commercial and office floors with sustainable architectural solutions.

On the entrance floor of the outer side of the complex along the entire perimeter there are 33 shops specially made for equipping cafes, shopping centers, and coffee shops.

28 offices for business centers are located above commercial shops along the entire outer perimeter of the project.

Everything necessary and necessary is located on the territory of the project and is done specifically for the convenience of their residents.

The project will be ready by the end of this year, in December. After completion of the project, a public school with a library and a park of 8 thousand square meters will be built on the territory next to the complex for the benefit of the city.
