Description

A new innovative residential complex, focused on modern requirements of comfort and technology.

The project is being built in the Oba region.

Consisting of 46 **1+1 apartments**, 30 **2+1**, **3+1** and **5+1** apartments, it offers a variety of housing options to suit different needs.

The infrastructure of the complex includes luxurious amenities for residents:

- Hammam, sauna, steam room and massage rooms: For relaxation and health maintenance.
 - Indoor and outdoor pools: Allow you to enjoy water activities all year round.
 - Fitness and Cinema: Provide opportunities for an active lifestyle and entertainment.
 - Barbecue area: For evening gatherings and pleasant meetings with neighbors.
 - Underground parking: Provides convenient and safe storage of cars.
 - Generator: Guarantees continuous power supply in case of possible outages.
- Private beach: Access to the sea is only 3000 meters, providing a unique opportunity for relaxation by the water.

In addition, the complex is one of the most technologically advanced projects in the Oba region.

It is equipped with the latest smart home system, including video surveillance on all floors.

Each apartment also has a private underground parking with a power station for charging electric cars, which meets modern environmental requirements.

Solar panels installed on the roof of a separate room with the infrastructure of the complex provide energy to the entire complex, helping to reduce the monthly costs of its maintenance.

Thus, the complex not only offers comfortable and modern housing, but also actively introduces environmentally sustainable solutions for the well-being of residents and the environment.

Construction start date: 01.2023

Construction completion date: 02.2025

During the construction period there is a 0% installment plan.
